PROFESSIONAL SUMMARY

Web Engineer with hands-on experience building production-ready web applications using React and Firebase. Focused on clean UI, real-time systems, authentication, and scalable frontend architecture.

EDUCATION

B.tech - AI & DS 2023-27

Mother Theresa Institute Of Engineering, JNTUA

CGPA : 8.5

Relevant Coursework & Highlights:

- Full Stack Web Development
- Database : SQL, Firebase, MongoDB
- Data Structures & Algorithms
- Machine learning

TECHNICAL SKILLS

- **Frontend: JavaScript (ES6+), React (Hooks, Context API)**
- **Backend & Database: Firebase Authentication, Firestore, Spring, Mysql**
- **Styling: HTML5, CSS3, Tailwind CSS**
- **Tools & Practices: Git, GitHub, VS Code, Responsive Design**

CERTIFICATIONS

- **Full Stack Web Development - Gen process**
- **Google - Android Development - Edu skills**
- **Generative Ai - Edu skills**
- **Ai tools - Talentize**

LANGUAGES

English, Hindi(basic), Telugu, Kannada

PROJECTS

Student Grievance

Tech: HTML, CSS, JavaScript, Firebase

- Built a full-stack anonymous reporting app with role-based auth for students and admins.
- Created real-time status updates via Firestore listeners for instant resolution feedback.
- Secured sensitive data using Firestore rules and deployed the scalable build on Vercel.

Resort Web site

Tech: Javascript, Tailwind css, Firebase, Spring Boot

- Built a dynamic CMS to replace hardcoded content with real-time, data-driven updates.
- Developed a secure admin dashboard to manage room inventory, pricing, and images.
- Integrated Firestore sync to instantly update user pages and restricted write access via role-based rules.

Pizza Ordering System

Tech: Front end and backend, React.js, Firebase

- Developed full CRUD interfaces for buyers and sellers with real-time inventory sync via Firestore.
- Designed a high-performance, responsive UI optimized for fast user interactions and seamless usability.

GHOST-NETWORK PRO v3.0

Tech: Java, React, Forensic Scanning Algorithms

- Engineered a high-speed forensics scanner and Pulse Console to visualize live data integrity streams.
- Built an automated report exporter using multi-threaded Java to handle large-scale system audits efficiently.

EXPERIENCE / PRACTICAL TRAINING

- Gained practical experience through Gen Process training, IC batch, and hackathons, building real-world full stack web applications.
- Worked on secure, scalable projects using React.js, JavaScript, and Firebase, while developing strong problem-solving and teamwork skills.

ACHIEVEMENTS

- Built and shipped multiple web applications under hackathon time constraints.
- Collaborated in small teams to design, debug, and deliver features efficiently.
